Announcement Date and projected index becomes available (if applicable)

Effective Date of the index rebalance

SAIR	Annual Index Review
QIR	Quartely Index Review
AR	Annual Review
QR	Quartely Review

Notes

MSCI Factor Indexes	The Rebalancing Date is the close of the second business day of the rebalancing month. The changes are announced as of the close of the second business day, implemented as of the close of the fourth business day, and effective from the fifth business day of the rebalancing month.
MSCI Strategy Indexes	MSCI Hedged Indexes Series have an additional currency component rebalancing specified by their individual schedules.
MSCI REIT Preferred Series	Reviewed on a quarterly basis, at the end of March, June, September and December. Additionally, the monthly share review process is designed to ensure that constituents of the index continue to reflect available market capitalization.
Bloomberg Indexes	The rebalancing will be effective on 1st Monday business day of the month.
CRSP Indexes	Transitional Reconstitution represents a departure from the standard practice of making all of the rebalance changes on a single day. The conversion from current index membership and holdings to their updated pro forma targets is completed over a five-day (Wednesday to Tuesday) transition period.
Market Vector Specialty Indexes	The Indexes are reviewed on a weekly basis for bucket rebalancing. Bucket weights are reviewed semi-annually (in June and December).
